

ROHIT KARDE

Full Stack .NET Developer

Pune, India · +91-9529085991 · karderohit09@gmail.com · linkedin.com/in/rohit-karde
github.com/karderohit · karderohit.github.io/rohit-portfolio · Remote | Immediate Joiner

PROFESSIONAL SUMMARY

Full Stack .NET Developer with **3.8 years of experience** designing and delivering scalable, high-performance backend systems and enterprise web applications for **FinTech** and **HealthTech** domains. Specialised in **C#, .NET 8/6, ASP.NET Core Web API, Microservices Architecture, REST API Development, Angular 15/16, and React.js**. Strong experience in **Clean Architecture, SOLID Principles, Entity Framework Core, SQL Server optimisation, JWT/RBAC security, SignalR real-time systems, and Azure DevOps CI/CD pipelines**. Delivered production systems handling **10,000+ daily transactions** and **500GB+ patient data**. Open to remote Full Stack .NET Developer roles across product-based companies, startups, and US/Europe remote opportunities.

TECHNICAL SKILLS

Backend/.NET	C#, .NET 8/6, ASP.NET Core Web API, Microservices, Entity Framework Core, LINQ, Stored Procedures, REST APIs, SignalR, Dependency Injection, Middleware
Frontend	Angular 15/16, TypeScript, RxJS Observables, Lazy Loading, NgModules, Route Guards, HTTP Interceptors, Reactive Forms, Angular Material, React.js, Redux, Hooks, HTML5, CSS3
Cloud/DevOps	Microsoft Azure, Azure DevOps, CI/CD Pipelines, Docker, Git, GitHub
Databases	SQL Server, MongoDB, Redis, T-SQL, Query Optimisation, Database Design
Architecture	Clean Architecture, SOLID Principles, Design Patterns, Microservices, RBAC, JWT Authentication
Testing	Jasmine, Karma, Unit Testing, Integration Testing, REST API Testing
Methodologies	Agile, Scrum, Remote Collaboration, Code Review

PROFESSIONAL EXPERIENCE

Full Stack .NET Developer

Automonk Technologies, Pune, India (Remote/Hybrid)

Aug 2022 – Apr 2026

3.8 Years

.NET / Backend Engineering

- Engineered high-performance **ASP.NET Core 8 REST APIs** by optimising LINQ queries and SQL stored procedures, reducing API response latency by **25%** across production services.
- Designed and implemented scalable **Microservices architecture**, decoupling core business modules such as Claims, Payments, and Inventory, reducing manual data processing by **30%**.
- Built secure **multi-tenant backend systems** processing **10,000+ daily financial transactions** with JWT-based authentication, refresh token rotation, and Role-Based Access Control.
- Optimised ASP.NET Web API database layer using query-level performance tuning to efficiently handle **500GB+ patient records** in a HealthTech platform with zero downtime.
- Implemented **SignalR real-time bi-directional communication** for live notifications, dashboards, and event-driven updates.
- Applied **Clean Architecture** and **SOLID Principles** to create maintainable, testable, and loosely coupled codebases.

Angular / Frontend Development

- Architected enterprise-grade **Angular 15/16 Single Page Applications** using TypeScript, RxJS Observables, Lazy Loading, NgModules, and custom Directives/Pipes.
- Implemented **Role-Based Access Control** and JWT authentication flow in Angular, reducing insurance claim processing time by **20%** through optimised UI workflows.
- Built reusable **Angular component libraries** and shared service layers adopted across multiple product modules, reducing frontend development effort by **15%**.
- Configured Angular Route Guards, HTTP Interceptors, and lazy-loaded feature modules to improve application security, load performance, and session management.
- Integrated SignalR events into Angular using **RxJS Subject streams** for live push notifications, appointment updates, and event-driven UI state management.

React.js / DevOps / Agile

- Developed **React.js** UI components with Hooks, Functional Components, and Redux for dynamic dashboards across Supply Chain and HealthTech product modules.
- Designed, configured, and managed **CI/CD pipelines in Azure DevOps**, automating build, test, and deployment stages and improving deployment success rate by **15%**.
- Collaborated in **Agile/Scrum cross-functional teams** of 6–10 members, consistently delivering sprint goals in a remote/hybrid environment.

KEY PROJECTS

Enterprise Banking & Insurance Portal

FinTech

.NET Core · ASP.NET Core Microservices · Angular 15/16 · Azure · JWT · SQL Server

- Designed and built a secure **multi-tenant banking backend** processing **10,000+ daily financial transactions** using ASP.NET Core Microservices.
- Architected an enterprise **Angular 15/16 SPA** with RBAC, JWT authentication, and Lazy Loading, reducing claim processing time by **20%**.
- Built reactive data flows with RxJS Observables for real-time transaction dashboards and optimised SQL stored procedures for

high-throughput financial data queries.

Healthcare Management Platform

HealthTech

ASP.NET Core Web API · Angular 15/16 · React.js · SignalR · Azure · SQL Server

- Built a telemedicine platform backend with real-time appointment scheduling, digital prescription APIs, and patient record management handling **500GB+ data**.
- Implemented **SignalR real-time notification service** for appointment confirmations and prescription alerts.
- Developed patient-facing React.js dashboards and reusable Angular component libraries, reducing development effort by **15%**.

Supply Chain & Logistics System

Logistics

.NET 8 · Microservices · React.js · Azure · SQL Server

- Designed **.NET 8 Microservices backend** for real-time inventory tracking and data processing pipelines, improving operational efficiency by **25%**.
- Developed React.js tracking dashboard with live inventory updates, alert management, and real-time status feeds using REST API integrations.

E-Learning Platform

EdTech

ASP.NET Core · SignalR · Angular 15/16 · SQL Server

- Built a full-featured LMS backend with course, user, and content management APIs.
- Implemented real-time student-instructor chat using **SignalR**.
- Developed an Angular analytics dashboard for performance tracking with reactive data visualisation using RxJS Observables.

EDUCATION

B.Sc. in Chemistry, Shivaji University, Maharashtra

2022

Self-taught developer – transitioned to software engineering in 2022 with a focus on .NET backend and full-stack web technologies.

ADDITIONAL INFORMATION

Work Authorisation	India Citizen · Authorised to work in the US
Availability	Immediate Joiner · Last Working Day: 28 April 2026
Work Mode	Remote Preferred · Open to Hybrid / On-site
Languages	English, Hindi, Marathi
Portfolio	karderohit.github.io/rohit-portfolio
GitHub	github.com/karderohit
