

ROHIT KARDE

Full Stack .NET Developer

Pune, India | +91-9529085991 | karderohit09@gmail.com | linkedin.com/in/rohit-karde

Professional Summary

.NET Developer with 4+ years of experience building scalable backend services and enterprise applications across FinTech, HealthTech, Logistics, and EdTech. Strong expertise in C#, .NET 8/6, ASP.NET Core Web API, microservices, Entity Framework Core, LINQ, SQL Server, REST APIs, SignalR, JWT/RBAC, Clean Architecture, SOLID principles, and Azure DevOps CI/CD. Delivered production systems supporting 10,000+ daily transactions and 500GB+ of patient data, reduced API response time by 25%, and automated build and deployment workflows. Experienced with Angular and React for API integration and end-to-end feature delivery.

Technical Skills

Core .NET	C#, .NET 8/6, ASP.NET Core Web API, REST APIs, Entity Framework Core, LINQ, Dependency Injection, Middleware, SignalR
Architecture	Microservices, Clean Architecture, SOLID Principles, Design Patterns, Multi-tenant Systems
Security	JWT Authentication, Refresh Token Rotation, Role-Based Access Control (RBAC), API Security
Databases	SQL Server, T-SQL, Stored Procedures, Query Optimization, Database Design, MongoDB, Redis
Cloud/DevOps	Microsoft Azure, Azure DevOps, CI/CD Pipelines, Docker, Git, GitHub
Testing	Unit Testing, Integration Testing, REST API Testing
Supporting UI	Angular 15/16, TypeScript, RxJS, Angular Material, React.js, Redux, HTML5, CSS3
Methodologies	Agile, Scrum, Code Review, Remote Collaboration

Professional Experience

Full Stack .NET Developer
Automonk Technologies, Pune, India

August 2022 – September 2026
Remote/Hybrid

.NET Backend Engineering

- Engineered high-performance ASP.NET Core 8 REST APIs using C#, LINQ, and SQL stored procedures, reducing production API response latency by 25%.
- Designed and implemented microservices for claims, payments, and inventory modules, reducing manual data processing by 30%.
- Built secure multi-tenant backend services processing 10,000+ daily financial transactions with JWT authentication, refresh token rotation, and RBAC.
- Optimized the ASP.NET Core data-access layer and SQL queries to support 500GB+ of patient data in a HealthTech platform with zero downtime.
- Implemented SignalR services for real-time notifications, live dashboards, appointment updates, and event-driven communication.
- Applied Clean Architecture and SOLID principles to create maintainable, testable, and loosely coupled services.

Frontend Integration

- Integrated ASP.NET Core APIs with Angular 15/16 applications using TypeScript, RxJS, route guards, and HTTP interceptors, improving claim-processing workflows by 20%.
- Built reusable Angular components and React.js dashboards consuming REST and SignalR services, reducing frontend delivery effort by 15%.

DevOps and Delivery

- Designed and maintained Azure DevOps CI/CD pipelines for automated build, test, and deployment stages, improving deployment success rate by 15%.
- Collaborated in Agile/Scrum teams of 6–10 members through sprint delivery, code reviews, and remote cross-functional coordination.

Key Projects

Enterprise Banking & Insurance Portal

FinTech

- C# / .NET Core / ASP.NET Core Microservices / EF Core / JWT/RBAC / SQL Server / Azure / Angular 15/16*
- Designed a secure multi-tenant ASP.NET Core microservices backend processing 10,000+ daily financial transactions across banking and insurance workflows.
 - Implemented JWT authentication, refresh token rotation, RBAC, and optimized SQL stored procedures for secure, high-throughput API operations.
 - Integrated the backend with an Angular 15/16 SPA and reactive RxJS data flows, reducing claim-processing time by 20%.

Healthcare Management Platform

HealthTech

- C# / ASP.NET Core Web API / SQL Server / SignalR / Azure / Angular 15/16 / React.js*
- Built backend APIs for appointment scheduling, digital prescriptions, and patient record management supporting 500GB+ of data.
 - Optimized Web API and SQL Server data access for reliability at scale and implemented SignalR notifications for confirmations and prescription alerts.
 - Exposed REST and real-time services consumed by Angular and React.js dashboards; reusable UI components reduced development effort by 15%.

Supply Chain & Logistics System

Logistics

- C# / .NET 8 / Microservices / REST APIs / SQL Server / Azure / React.js*
- Designed .NET 8 microservices and data-processing pipelines for real-time inventory tracking, improving operational efficiency by 25%.
 - Delivered REST API integrations for live inventory updates, alerts, and status feeds consumed by a React.js tracking dashboard.

E-Learning Platform

EdTech

- C# / ASP.NET Core Web API / SignalR / SQL Server / Angular 15/16*
- Built ASP.NET Core APIs for course, user, and content management and implemented real-time student-instructor chat using SignalR.
 - Integrated the services with an Angular analytics dashboard using RxJS-based reactive data flows.

Education

B.Sc. in Chemistry, Shivaji University, Maharashtra

2022

Self-taught developer who transitioned to software engineering in 2022, focusing on .NET backend and full-stack web technologies.

Additional Information

Work Authorization	Indian citizen; authorized to work in India and the United States
Availability	Last working day: 28 September 2026
Work Mode	Remote preferred; open to hybrid or on-site roles
Languages	English, Hindi, Marathi
Portfolio	karderohit.github.io/rohit-portfolio
GitHub	github.com/karderohit
