Pune, India | +91-9529085991 | karderohit09@gmail.com | linkedin.com/in/rohit-karde

Full Stack .NET Developer | Remote | Immediate Joiner | Last Working Day: 28 April 2026

PROFESSIONAL SUMMARY

Full Stack .NET Developer with **3.5 years** of experience designing and building scalable, high-performance backend systems and enterprise web applications for **FinTech** and **HealthTech** domains. Specialised in **C#, .NET 8/6, ASP.NET Core, Microservices**, and REST APIs with strong frontend skills in **Angular 15/16** and **React.js**. Proven expertise in Clean Architecture, SOLID Principles, Entity Framework Core, SQL Server, and Azure DevOps CI/CD pipelines. Delivered systems handling **10,000+ daily transactions** and **500GB+** data. Seeking a **remote Full Stack .NET Developer** role in a product-driven team.

TECHNICAL SKILLS

.NET / Backend: C#, .NET 8/6, ASP.NET Core, Web API, Microservices, Entity Framework Core, LINQ, Stored Procedures, REST APIs, Dependency Injection, Middleware, SignalR
Angular / Frontend: Angular 15/16, TypeScript, RxJS Observables, Lazy Loading, NgModules, Custom Directives & Pipes, Angular Material, Bootstrap, Reactive Forms, Route Guards, HTML5, CSS3
React / Frontend: React.js, JavaScript ES6+, Hooks, Functional Components, Redux
Databases: SQL Server, MongoDB, Redis, T-SQL, Stored Procedures, Query Optimisation, Database Design
Cloud & DevOps: Microsoft Azure, Azure DevOps, CI/CD Pipelines, Git, Docker
Architecture: Clean Architecture, SOLID Principles, Design Patterns, Microservices, Dependency Injection
Testing: REST API testing, Unit Testing, Integration Testing
Additional: Node.js, SignalR, Agile/Scrum, Remote Collaboration

PROFESSIONAL EXPERIENCE

Full Stack .NET Developer (Angular | React)

Automonk Technologies, Pune, India (Remote/Hybrid)
.NET / Backend Contributions:

Aug 2022 – Feb 2026 | 3.5 Years

- Engineered high-performance **REST APIs** using ASP.NET Core 8 by optimising LINQ queries and SQL stored procedures, reducing response latency by **25%**.
- Designed and developed scalable **Microservices architecture**, decoupling core business modules and reducing manual data processing by **30%**.
- Built secure multi-tenant backend systems handling **10,000+ daily financial transactions** with JWT-based authentication and role-based authorisation.
- Optimised ASP.NET Web API backend database layer to efficiently handle **500GB+** patient data in a HealthTech platform.
- Implemented real-time communication using **SignalR** for live notifications and event-driven updates across multiple modules.
- Applied **Clean Architecture** and SOLID Principles to ensure maintainable, testable, and scalable codebase across all projects.

Angular / Frontend Contributions:

- Architected enterprise **Angular 15/16 SPAs** with TypeScript, RxJS Observables, Lazy Loading, custom Directives and Pipes for scalable modular frontends.
- Implemented **RBAC** and JWT authentication in Angular, reducing claim processing time by **20%**.
- Developed reusable **Angular component libraries** and shared service layers, reducing development effort by **15%** across multiple modules.
- Configured **Angular Route Guards, HTTP Interceptors**, and lazy-loaded feature modules to improve security and performance.

React / DevOps / Agile:

- Developed **React.js** UI components with Hooks and Redux for dynamic, interactive user experiences across multiple product modules.
- Managed **CI/CD pipelines** in Azure DevOps, improving deployment success rate by **15%**.
- Collaborated in **Agile/Scrum** cross-functional teams, delivering sprint goals consistently in a remote/hybrid setup.

KEY PROJECTS

Enterprise Banking & Insurance Portal <i>.NET Core, Microservices, Angular 15/16, Azure, JWT</i>	<i>FinTech</i>
• Built secure multi-tenant banking backend handling 10,000+ daily transactions using ASP.NET Core Microservices. • Implemented Microservices architecture to decouple Claims and Payments modules for independent scalability and deployment. • Developed JWT-based authentication and RBAC system across backend and Angular frontend, reducing claim processing time by 20%. • Optimised SQL stored procedures and LINQ queries for high-throughput financial data processing.	
Healthcare Management Platform <i>ASP.NET Core, Web API, Angular 15/16, React.js, Azure</i>	<i>HealthTech</i>
• Built telemedicine platform backend with real-time appointment scheduling and digital prescription APIs. • Optimised ASP.NET Web API backend database handling for 500GB+ patient records with query-level performance tuning. • Implemented SignalR-based real-time notification service for appointment confirmations and prescription alerts. • Built patient-facing React.js dashboards for appointment booking and prescription management.	
Supply Chain & Logistics System <i>.NET 8, Microservices, React.js, Azure, SQL Server</i>	<i>Logistics</i>
• Designed and built .NET 8 Microservices backend for real-time inventory tracking and data processing. • Improved operational efficiency by 25% through real-time data pipelines and optimised backend APIs. • Developed React.js tracking dashboard with live inventory updates and alert management.	
E-Learning Platform (LMS) <i>ASP.NET Core, SignalR, Angular 15/16, SQL Server</i>	<i>EdTech</i>
• Built ASP.NET Core backend with robust course, user, and content management APIs supporting a full-featured LMS. • Implemented real-time chat and notification service using SignalR for live student-instructor interaction. • Developed Angular analytics dashboard for student and instructor performance tracking.	

EDUCATION

B.Sc. in Chemistry	2022
<i>Shivaji University, Maharashtra</i>	
• Self-taught developer; transitioned to software development in 2022 with a focus on .NET backend and full-stack web technologies.	

ADDITIONAL INFORMATION

Languages: English (Expert) | Hindi (Expert) | Marathi (Native)
Work Authorisation: India (Citizen) | Authorised to work in the US
Availability: Immediate Joiner | Last Working Day: 28 April 2026
Work Mode: Remote (Preferred) | Open to Hybrid / On-site
